Note:

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau.

All denominators use US Census data from 2002.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

2a None

Age: None

Race: None

Overall: Age based upon age at admission/enrollment or age at beginning of period (July 1, 2003), whichever is latest. A MH consumer is defined as any consumer served by GA SMHA with a primary or secondary MH diagnosis. Georgia's MIS system does not collect the ethnic category of "Native Hawaiian or Pacific Islander" nor does it allow for classification in more than one racial or ethnic category. Totals reported under "more than one race reported" depict persons classified as "multiracial."

2b None

Age: None

Race: None

Overall: None

ACCESS DOMAIN: TABLE 2. PERSONS SERVED IN COMMUNITY MENTAL HEALTH PROGRAMS BY AGE AND GENDER, FY 2003

STATE: **Georgia**

TOTAL	151,016	100%	4,683,308	100%	17.6	17.6	47

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 3a.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Gender: None

Age: None

Overall: Whether the consumer has been homeless in the past 90 days measured at enrollment, 90 days after enrollment, annually, and upon completion of services for consumers receiving MH services. It is not based upon diagnosis. The numbers reported above are based upon the last available assessment of living situation for a consumer during the reporting period. Difference between number of consumers with living situation assessed and the unduplicated count of MH consumers served in community settings is listed on the "No data available" row. Because the unduplicated count of community MH consumers from the MIS system has no missing values for gender or age, totals will not add to the actual total number served.

Note:

This table uses data from DIG Tables 5a, and 5b (Hispanic Origin).

Data is based on duplicated counts.

State Notes:

2a Overall: Age based upon age at admission/enrollment or age at beginning of period (July 1, 2003), whichever is latest. A MH consumer is defined as any consumer served by GA SMHA with a primary or secondary MH diagnosis. Georgia's MIS system does not collect the ethnic category of "Native Hawaiian or Pacific Islander" nor does it allow for classification in more than one racial or ethnic category. Totals reported under "more than one race reported" depict persons classified as "multiracial."

2b Overall:

5a Overall: An External Review Organization (ERO) maintains a separate database of consumers authorized to receive a Medicaid-reimbursable MH service. The state's MIS maintains a database on all consumers receiving state-funded MH services, with no distinction made between Medicaid and non-Medicaid consumers. In the table above, the "Medicaid only" row is an unduplicated count of consumers authorized to receive a Medicaid-reimbursable service during the reporting period from our ERO. Some services received by these consumers during the reporting period may or may not have been Medicaid reimbursable. The "Non-Medicaid only" row is the difference between the count of authorized Medicaid consumers and total number of MH consumers served (unduplicated). Our ERO reports a higher number of "Other/Unknown" than our information system. Because the difference between Medicaid "Other/Unknown" and total served "Other/Unknown" are negative numbers, these totals have been replaced with zeros on the "Non-Medicaid" row. For this reasons, totals here do not match the total reported in Table 2.

5b Overall: An External Review Organization (ERO) maintains a separate database of consumers authorized to receive a Medicaid-reimbursable MH service. The state's MIS maintains a database on all consumers receiving state-funded MH services, with no distinction made between Medicaid and non-Medicaid consumers. In the table above, the "Medicaid only" row is an unduplicated count of consumers authorized to receive a Medicaid-reimbursable service during the reporting period from our ERO. Some services received by these consumers during the reporting period may or may not have been Medicaid reimbursable. The "Non-Medicaid only" row is the difference between the count of authorized Medicaid consumers and total number of MH consumers served (unduplicated). Our ERO reports a higher number of "Other/Unknown" than our information system. Because the difference between Medicaid "Other/Unknown" and total served "Other/Unknown" are negative numbers, these totals have been replaced with zeros on the "Non-Medicaid" row. For this reasons, totals here do not match the total reported in Table 2.

When is Homeless Status Measured?

Note:

This table uses community data from URS/DIG Table 3a.

State Notes:

None

None

Whether the consumer has been homeless in the past 90 days measured at enrollment, 90 days after enrollment, annually, and upon completion of services for consumer receiving MH services. It is not based upon diagnosis. The numbers reported above are based upon the last available assessment of living situation for a consumer during the reporting period. Difference between number of consumers with living situation assessed and the unduplicated count of MH consumers served in community settings is listed on the "No data available" row. Because the unduplicated count of community MH consumers from the MIS system has no missing values for gender or age, totals will not add to the actual total number served.

APPROPRIATENESS DOMAIN: TABLE 2. NUMBER OF ADMISSIONS DURING THE YEAR TO STATE HOSPITAL INPATIENT AND COMMUNITY-BASED PROGRAMS, FY 2003

Age NA			176			33,464			

Note:

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3b, State Total Served During Year is calculated using data from URS/DIG Tables 3a and 3b.

This table uses data from URS/DIG Tables 3a, 3b, and 6.

State Notes:

3a Gender None

Age None

Overall Whether the consumer has been homeless in the past 90 days measured at enrollment, 90 days after enrollment, annually, and upon completion of services for consumers receiving MH services. It is not based upon diagnosis. The numbers reported above are based upon the last available assessment of living situation for a consumer during the reporting period. Difference between number of consumers with living situation assessed and the unduplicated count of MH consumers served in community settings is listed on the "No data available" row. Because the unduplicated count of community MH consumers from the MIS system has no missing values for gender or age, totals will not add to the actual total number served.

3b Gender None

Age None

Overall The 6 clients 0-17 served in state psychiatric facilities were adults with incorrect birthdates."

6 Hospital None

Other Inpatient None

Residential None

Community None

Overall Age based upon age at admission/enrollment or age at beginning of period (7/01/2002), whichever is latest. A MH consumer is defined as any consumer served by GA SMHA with a primary or secondary MH diagnosis. Forensics are included. Because LOS measure is the mean, it is impacted by the discharge of very long-term consumers. SPECIAL NOTE ON COMMUNITY PROGRAMS ONLY: Duplicated admissions count based upon algorithm to define new service episodes. A new service episode (admission) is defined as a consumer who enrolls in a service during the reporting period and, at the time of enrollment, had not been active in any other services offered by the Division over the prior 90 days.

TOTAL	6,711	27,655	34,366	34,366	19.5%	31.6%	19.5%	22.3%	42

Note:

Mental Health Adults in Labor Force is the sum of MH consumers employed plus unemployed.

Adults Served in Community excludes persons for whom employment status was unknown.

MH Consumers Employed as % of Total Adults Served uses Adults Served as the denominator.

MH Consumers Employed as % of Adults served in Labor Force uses persons employed or Unemployed as the denominator.

This table uses data from URS/DIG Table 4.

State Notes:

None

None

Employment data derived from outcome assessment instrument administered to adult consumers receiving outpatient MH services at enrollment, 90 days, annually, and at discharge. Difference between number of consumers assessed and the unduplicated count of Adult MH consumers served in community settings is listed on the "No data available" row. Because this count of community Adult MH consumers from the MIS system has no missing values for gender or age, totals will not add to the actual total number served. The numbers reported above are based upon the last available assessment of the employment status for a consumer during the reporting period. Not in labor force will be added as an option on the assessment beginning in FY04.
